

VEHICLE REGENERATIVE DECELERATION ACTUATOR AND INDICATOR SYSTEM AND METHOD

Regeneration-only light Figure 2 (lower of assembly) 4 or 5 illuminates when the vehicle decelerates beyond .007g (rolling in gear .003g). If the brakes are engaged Regeneration-only turns off by definition, and brake light set 2&3 (upper) illuminate. Also see Figure 3, item 3 high center brake. Operator initiated Regeneration only - item 7 on Figure 4.
